

Securing Healthcare Facilities; Making Care The Priority

Healthcare organizations are increasingly concerned about growing weapon threats. As recent reports reveal, including the latest from the Mayo Clinic, violent incidents are being reported at 2.5 per 100 beds, five times more frequent in healthcare facilities than in other industries.

In a landscape where healthcare facilities face an unprecedented surge in weapon threats, Xtract One emerges as the definitive solution, seamlessly blending cutting-edge security technology with operational intelligence. SmartGateway, our tailored entry screening solution is meticulously designed to not only identify potential threats but also ensure minimal disruption to the critical flow of patients, staff, and visitors.

Features and Benefits

Smart Threat Detection Technology

Xtract One's advanced AI ensures the accurate identification of potential threats, significantly reducing the risk of violent incidents.

Discrete Security Alerts

Swift and efficient responses are facilitated through discrete security alerts, maintaining a calm environment for patients, staff, and visitors.

Seamless Deployment

SmartGateway's low-impact and aesthetically pleasing design ensures the security solution seamlessly integrates with your facility environment.

Case Study: Sentara Healthcare and SmartGateway

During a 90-day pilot:

1,877 weapons were detected and kept from entering the building.

5.6% of all scanned individuals were carrying a weapon or prohibited item. These weapons included firearms, knives, machetes, pepper sprays, swords, self-defense batons, box-cutters, brass knuckles, a crossbow, crowbar, multi-tools with knife blades, and tasers.

An additional 5.5% of individuals approached the SmartGateway, turned around and walked back to their car, or alerted and declined secondary screening and returned to their car.

The number of weapons detected is declining over time, showing evidence that the system, and patron familiarity, successfully becomes a deterrent.

The Results:

The results, and the large number of weapons detected effectively, along with the ease of use and alignment to hospital operations was compelling enough for Sentara to define a program to deploy SmartGateways at all hospitals in the Sentara Healthcare system.

At Xtract One, our journey doesn't end with the installation of a security system; it begins with a commitment to ongoing support and training. Our experienced team collaborates directly with you, ensuring your facility remains adaptable to evolving security challenges and business objectives. Choose Xtract One for a future where healthcare security is not just a necessity but a seamlessly integrated aspect of your operations.
